WHO I AM

About Me

My background, education, and professional identity as an aspiring software developer in Australia.

BACKGROUND

My Story

I am Pradip Dhakal, an aspiring software developer currently based in Australia. My journey in software development began over a decade ago and has taken me through hands-on roles in web application development, database management, and team collaboration.

With more than eight years of professional experience at IT Arrow Pvt Ltd in Nepal, I developed a strong foundation in PHP, JavaScript, SQL, and modern web technologies. I worked across the full development cycle — from database design to frontend implementation to production deployment.

I have now transitioned to Australia to further my education and career. I am committed to growing as a developer, contributing to meaningful projects, and building a long-term career in software development.

Nepal

Completed undergraduate studies in Computer Science/IT, covering programming fundamentals, database systems, software engineering, and networking principles.

Programming Databases Networking

IDENTITY

Professional Identity

have experience working with Laravel, JavaScript, and SQL to build practical systems. My background includes both academic projects and professional experience as a software developer.

⚙️

Reliable & Efficient

I focus on developing reliable and efficient applications. I follow coding standards and apply basic security practices in my work.

🤝

Collaborative by Nature

I value teamwork, clear communication, and continuous learning. I thrive in collaborative environments where ideas are shared openly.

🎯

Goal-Oriented

My goal is to build a career as a software developer in Australia, contributing to real-world projects that solve meaningful business problems.

📈

Continuous Learner

I aim to continually improve my technical skills, keep up with evolving technologies, and adapt to new challenges in the Australian IT industry.
