CAPABILITIES

Skills

My technical, professional, and graduate attributes developed through years of experience and study.

TECHNICAL

Technical Skills

Programming languages, frameworks, and tools I use to build software.

JavaScript	80%
SQL	85%
HTML	95%
CSS	88%
MySQL	88%
Tailwind CSS	80%
Git & GitHub	78%
Vite / cPanel	72%

🐘

PHP
Backend Development

Laravel
PHP Framework

🟡

JavaScript
Frontend Logic

🐬

MySQL
Database

Tailwind CSS
UI Styling

Git & GitHub
Version Control

Vite
Asset Bundling

cPanel
Hosting / Deploy

PROFESSIONAL

Employability Skills

Core professional attributes I bring to any workplace.

Problem Solving

I approach technical challenges systematically — identifying root causes, evaluating options, and implementing clean solutions. Developed through years of debugging complex systems and finding practical fixes under pressure.

Teamwork

I collaborate effectively in team environments, sharing responsibilities, supporting colleagues, and contributing to shared goals. Experience across professional and university team projects in diverse cultural settings.

Communication

I communicate clearly in both technical and non-technical contexts. Able to write documentation, explain code decisions, and present ideas to stakeholders in a straightforward and professional manner.

Time Management

I manage multiple tasks and deadlines effectively. Experienced in balancing ongoing work responsibilities, academic commitments, and personal development without compromising quality.

Adaptability

I adapt quickly to new environments, tools, and challenges. Whether transitioning to new codebases, frameworks, or workplace cultures, I embrace change as an opportunity to grow and improve.

Continuous Learning

I am committed to ongoing professional development. I actively seek to expand my knowledge, stay current with industry trends, and apply new skills to improve my work and career prospects.

GRADUATE

Graduate Attributes

Key qualities developed through academic study and professional experience.

development tooling.

Problem Solving Ability

Capable of analysing complex technical problems, researching solutions, and implementing them in a clear, structured way.

Ethical Awareness

Understanding of ethical responsibilities in software development, including data privacy, security, intellectual property, and professional conduct.

Communication Skills

Effective communicator in both technical and professional contexts, with experience in documentation, reports, team meetings, and stakeholder presentations.

Committed to continuous personal and professional development, actively pursuing new knowledge and skills in a rapidly changing technology landscape.
