CAPSTONE

Capstone Project

A full-stack childcare matching platform developed as the capstone project for CSC6200 Advanced ICT Professional Project at the University of Southern Queensland. Built for a real client — Angela Cochrane of Future Care Network — the platform addresses a critical gap in regional Australian childcare access.

Families in rural and regional Australia currently rely on unregulated Facebook groups with 50,000+ members to find childcare. Educators face $10,000 startup costs with no structured support. This platform was built to solve both problems with a verified, centralised matching system.

Project Deliverables

✓ Working MVP system for child caer facelity

✓ Family and educator registration with secure login

✓ Admin dashboard with live KPIs and data visualisation

✓ Blue Card compliance tracking

✓ Regional demand heatmap for government funding support

✓ Full documentation and user manual delivered to client

Tech Stack

Laravel 11 PHP 8.3 MySQL Bootstrap 5

Chart.js JavaScript Agile
